Discord Server Setup, Role Management, Bot Configuration, Community Moderation, Event Organization

PROJECTS

Swift Tab – Windows 11 Taskbar App 2026 – Present
Product Design | AI-assisted Windows App Development
Designing and building (with AI-assisted development) a Windows 11 app that docks a compact pill to the taskbar with media controls, Bluetooth earbud battery, weather, a clipboard stash and a file shelf, managed from a Control Center with a toggle for each module.

WidgetLab – Multi-Widget Android Application ↗ 09/2026 – Present
Product Design | AI-assisted Android App Development | Kotlin • XML • Android SDK
Designed and built WidgetLab, a customizable Android app featuring Bluetooth earbuds, media, and weather widgets with dynamic theming and real-time updates.

GymBros – Android Fitness & Workout Tracking App ↗ 2026
Product Design | AI-assisted Android App Development | Kotlin • Jetpack Compose • Firebase • Spotify API
Designed and built a workout tracker for fast logging of strength and cardio sessions, with progress tracking, hydration tracking, Spotify playback controls and cloud backup.

Recall – Android Memory & Reminders App ↗ 2026
Product Design | AI-assisted Android App Development
Designed and built an app that keeps saved items, locations and reminders in one place, with Ask Recall, a Library, a Replay timeline and Google Drive backup.

XGAMERS – Digital Marketing Brand Simulation ↗ 07/2025 – 08/2025
- Developed a conceptual gaming brand during internship to apply digital marketing strategies.

Data Analytics for understanding career aspirations 08/2025 – 08/2025
- Analyzed survey data to uncover trends and insights into Gen Z’s career aspirations using data analytics techniques.
